PROFESSIONAL SUMMARY

Motivated Computer Science Engineering fresher with a strong interest in Web Development. Skilled in building responsive and user-friendly websites using frontend and backend technologies. Seeking an entry-level Web Developer & Software Engineer role to contribute to real-world product development.

EDUCATION

B.Tech — Computer Science & Engineering 2022 – 2026

Kalasalingam University, Virudhunagar, Tamil Nadu | CGPA: 7.00

TECHNICAL SKILLS

Programming Languages: JAVA, JavaScript,

Web Development: HTML, CSS, React.js, Tailwind CSS, Node.js, Express.js

Database: SQL, MongoDB

Tools: MS Excel, GitHub, VS Code

PROFESSIONAL TRAINING & PRACTICAL EXPERIENCE

MERN Stack Development — Ongoing April 2026 – Present

Rohil Technologies, Virudhunagar

- Pursuing a 6-month MERN Stack Development course covering MongoDB, Express.js, React.js, and Node.js.
- Gaining hands-on experience by contributing to real-time web development projects alongside the training.
- Developing responsive web applications using React.js and integrating backend services and REST APIs.
- Practicing database integration, CRUD operations, Git, and GitHub through practical project work.

PROJECTS

Food Ordering System

React.js · JavaScript · HTML · CSS

- Developed a fully responsive food ordering web app with dynamic menu display, cart management, and checkout functionality.
- Architected a centralized assets.js file to manage menu data, implementing dynamic rendering with React Hooks for real-time UI updates.
- Built reusable, modular components for menu items, cart, and checkout, improving maintainability and scalability.

Real-Time Crypto Price Tracker

React.js · JavaScript · CoinGecko API

- Developed a responsive real-time cryptocurrency tracking application using React.js and the CoinGecko API.
- Implemented INR pricing, search, watchlist, 30-second auto-refresh, and manual refresh features.
- Added quantity selection with dynamic total-value calculation and a persistent watchlist using localStorage.

RFID-Based Medicine Dispenser (IoT + Cloud)

ESP8266 · React.js · Cloud

- Engineered an IoT-based automated medicine dispenser using ESP8266 and RFID technology with time-based dispensing logic.
- Integrated cloud data logging for remote monitoring; built a React.js dashboard for real-time system tracking and user interaction.

- Validated system accuracy and reliability through end-to-end testing; co-authored an IEEE-accepted research paper on this project.

Course Institute Website

HTML · Tailwind CSS · JavaScript

- Built a fully responsive training institute website featuring course listing, syllabus popups, student reviews, and a contact form.
- Implemented clean UI/UX design using Tailwind CSS, ensuring cross-device compatibility and fast load performance.

RESEARCH & PUBLICATIONS

RFID-Based Individual Medicine Dispenser with Cloud Integration and AI-Driven Health Assistant

Accepted – IEEE 5th International Conference on Communication, Computing and Electronics Systems (ICCCES 2026), Jan 2026

Authors: Dr. D. Balakrishnan, Uday Prakash B, Meka Jahnvi, Mettupalli SunkiReddy Hamsika, S. Sanjay | Paper ID: ICCCES-999

- Contributed to system testing, validation, and performance evaluation of the IoT-based medicine dispensing system.
- Worked on RFID integration, cloud connectivity, and AI-driven health assistant module development.

CERTIFICATIONS & ACHIEVEMENTS

Achievements

- IEEE COMM Hack 2026 – 3rd Prize: Secured 3rd place in a 24-hour hackathon organized by IEEE Communications Society Student Branch, Kalasalingam Academy of Research and Education.

Certifications

- Design and Analysis of Algorithms – CodeChef
- Python Programming Certificate – Simplilearn
- Java Programming Certificate – Udemy
